 ABUBAKR MAHMOUD

CAREER SUMMARY

Freelance Php Developer Ninja with expert skills in HTML, CSS, and JavaScript, delighted about the constantly evolving world of front-end web who finds ways to express complicated ideas through intuitive design. Trying always to come up with new and simplified ideas, which usually results in more with less. My passions for efficiency is reflected in my daily life and I love working with multidisciplinary and smart teams. I shine in a quick-turnaround environment, writing quick loading, efficient code, and thrilled by the challenge of pushing the limits of front-end development, delivering disruptive, and innovative solutions to the world that will fascinate my customers. Besides being a front-end developer, I am also the ultimate power web user, who is always up-to-date with the latest trends and discoveries in web development technology and working experience ranging from small websites to multi-million dollar applications

WORK EXPERIENCE

● Php Developer

2018 - Present

Responsible for managing back-end services and the interchange of data between the server and the users. Development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end.

Responsibility :

- Integration of user-facing elements developed by front-end developers.
- Build efficient, testable, and reusable PHP modules
- Solve complex performance problems and architectural challenges .

Technologies used:

[php](#) [laravel](#) [Bootstrap](#) [HTML/SASS](#) [GraphQL](#)

● Mean Stack Developer

2017 - 2018

Software Engineer specialized in developing web applications with so called MEAN, a collection of JavaScript-based technologies.

Responsibility :

- Design overall architecture of the web application.
- Design, build, and maintain efficient, reusable, and reliable code
- Build Efficient, High-performance, Modular, reusable front-end UI components.
- Learn and absorb new technologies quickly

Technologies used:

[NodeJs](#) [express](#) [Webpack](#) [pug/SASS](#) [Heroku](#)

● Front End Developer

2016 - 2017

Develop web pages and landing pages.

Optimize website for a better performance and speed.

Ensure the website works correctly across all screens/devices/browsers.

Develop user interface elements and widgets.

Integrate back-end with front-end.

Test the website and identify any technical problems.

Technologies used:

[php](#) [JavaScript](#) [jQuery](#) [Ajax](#) [JSON](#) [jQuery](#) [HTML/SASS](#)

● UI Developer

2015 - 2016

The role is to provide the user interface solution to the end user, including the final look, feel and behaviour of the interface in different contexts.

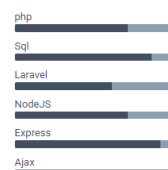

Convert Psd to Html5

Technologies used:

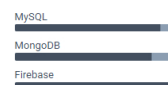

[JavaScript](#) [jQuery](#) [HTML/CSS](#) [Bootstrap](#) [Psd to Html](#)
